Need a hand with platform integration?

Now you can have complete Windows NT[®] and UNIX[®] integration!

Tired of piecemeal efforts to integrate UNIX[®] and Windows NT[®]? Intergraph Corporation and Softway Systems have teamed up to provide **OPENNT/NFS SOLUTIONS** – your complete answer to UNIX integration. Run a native UNIX operating subsystem with a full suite of UNIX utilities and Internet tools on a Windows NT platform and access remote files and printers with NFS[®]. Deploy UNIX and Windows NT client and server systems with common applications and services.

Configurations include:

OPENNT/NFS WORKSTATION – Windows NT Workstation user can run UNIX applications, run and display X11 applications, and access network file and print services.

OPENNT/NFS SERVER – Windows NT Server acts as a UNIX and X11 application host and provides UNIX network file services.

OPENNT/NFS GATEWAY SERVER – Windows NT Server acts as a UNIX and X11 application host while providing a powerful gateway to NFS resources for Windows users.

Who Is Responsible for Thousands of UNIX Solutions on Windows NT ?

NuTCRACKER

(that's who!)

Already, NuTCRACKER® has produced thousands of UNIX® software solutions on Windows NT® for customers in Federal Government, manufacturing, oil & gas, CAD/CAM, telecommunications, retail, financial, software and other industries. The reason? NuTCRACKER lets UNIX programs run natively in the Windows® environment.

NuTCRACKER extends the powerful Win32® subsystem, allowing rich integration between UNIX and Windows programs. That makes it the perfect solution for Windows 95/98 and Windows NT users. Plus, NuTCRACKER's "write once—deploy many" capability supports full, cross-platform development. When your source program is written once on any brand of UNIX—it can run on any Windows NT/95/98 workstation or server.

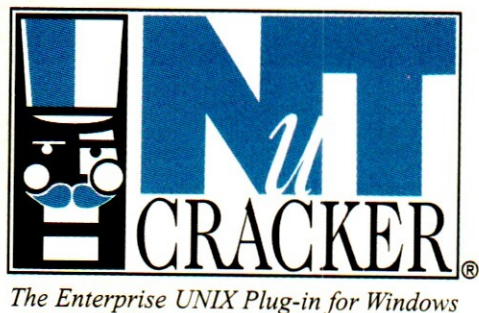

Developers love how much NuTCRACKER cuts development time—70%, 80%, even 90%. And there are thousands of customers and case studies to prove it. Call today and see why NuTCRACKER should be your UNIX to NT solution.

To find out about our 30-day risk-free trial offer, call today.

With Windows NT® Workstation on the rise, investing in a SUN workstation with UNIX may not be the best choice. Because you don't want to end up with a complicated system that may become outdated. Fortunately, you don't have to sacrifice functionality to stay current with the times. Every high-performance Dell® WorkStation is built to meet the demanding needs of 2D and 3D design, financial modeling, software development and over 100,000 WIN32 applications. And then there are all the standard benefits of owning a

NEW REPORT SUGGESTS IT'S WISE TO STAY AWAY FROM THE SUN.

Dell. Like custom configuration, next-business-day on-site^a service and support, and lower prices. And with Windows NT Workstation, you may save even more, without the need to train or hire UNIX experts. The hassle of running two separate systems becomes a thing of the past, too. So, the decision is easy. Come rain or shine. To custom order your Dell WorkStation with Windows NT Workstation today, call 1-800-424-1374. Or visit our website at www.dell.com/products/workstat/go.

"Native UNIX Product. Native Windows Code. With Wind/U we have both."

Mark Young

Senior Systems Architect

Andyne Computing Limited,
A Hummingbird Company

"Many of our key customers need both Windows® and UNIX® versions of our product—major sales hinge on this requirement. Wind/U® is the only cross-platform solution that lets us use our Windows® source code to deliver a native UNIX version of Andyne® GQL®. With Wind/U, all the powerful Windows features that we use are available across platforms. And by using a single source, we **save the time and cost of developing twice** and get GQL to our UNIX/Motif customers fast.

Having Windows and UNIX versions gives us a competitive advantage. Wind/U helps us achieve this edge."

Gain a competitive edge: www.bristol.com

UNIX REVIEW'S PERFORMANCE COMPUTING

Here's Your 1998 UNIX Buyer's Guide

Welcome to *UNIX Review's Performance Computing's* 1998 UNIX Buyer's Guide, the only buyer's guide of its kind in the industry. While our magazine recently changed its name to better reflect the diversity of topics we cover for the enterprise, we made a deliberate decision to continue to include only UNIX products in this year's buyer's guide.

In mid-December, we sent questionnaires out to the vendor community and received responses from more than 400 companies. Although no UNIX buyer's guide can be comprehensive, our hardware and software product categories represent the majority of UNIX vendors.

This year, we included over 700 hardware products, ranging from routers and switches to the largest servers available on the market today. More than 1,200 software products also are featured, from GUI tools to firewalls to compilers.

The 1998 buyer's guide is a testament to the strength of the UNIX industry. Although the number of companies has decreased slightly since our first buyer's guide three years ago, we have seen an almost 20 percent increase in the number of products. The recent entrance of network computers, portable UNIX systems, and products like SCO's Tarantella meant we had to look differently at the kind of product categories we offer as well.

We think you will find this to be an effective reference tool, but your suggestions for improvement are welcome. E-mail me at khartlove@mfi.com.

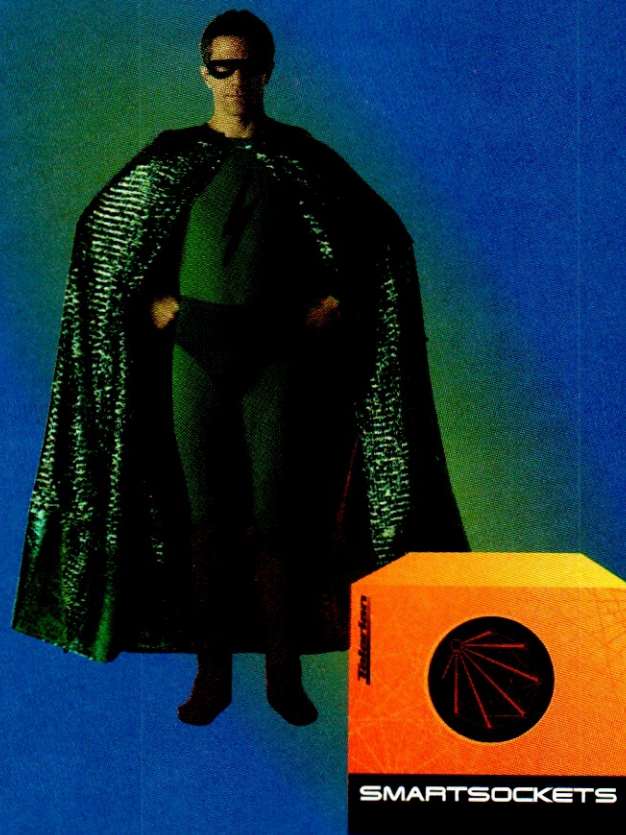

khartlove

Katherine Hartlove, Associate Editor

**performance-
computing
-com**

The UNIX Buyer's Guide is available on our Web site and includes a fully searchable index. You can request product information by linking directly to vendors' Web sites or by using our FYI service to request information straight from selected vendors.

Ahead of Schedule.

Introducing a new concept
to distributed application
development.

Find out what today's most advanced
publish-subscribe middleware can do for you.
**SmartSockets® RIDE™ technologies, project
acceleration for developers with deadlines.**

Feeling "challenged" by distributed application
development schedules? Shorten the cycle from
start to finish with SmartSockets RIDE. By simplifying
layers of complex network programming details,
SmartSockets' **Rapid Infrastructure Development
Experience™** turns enterprise computing pros into
heroes – in no time at all. (Costume not included.)

Why have leaders like NASA, MCI, ADP, and
Philadelphia Stock Exchange selected SmartSockets
as their middleware of choice? Talarian's exclusive
RIDE technologies drive application development
faster by combining **true publish-subscribe** functionality
with **the richest API** available – along with dynamic
message routing, a hierarchical namespace, unlimited
scalability, and **100% fault tolerance** with guaranteed
message delivery and hot failover. SmartSockets RIDE
offers the most direct path to "ahead of schedule."
It works. Out of the box. Today.

Get up to speed with our free booklet, "Accelerate
Distributed Application Development Now."
Call 1-800-883-8050, ext. 137.
Or visit us at www.talarian.com.

THE MOVERS ARE HERE.

Now, with OPENNT™ for Windows NT,™ you can complete a typical two-year porting job in as little as two weeks.

Of course, some ports will always take longer than others.

But there's no hype whatsoever in the word "weeks." In fact, the Apache server was ported with OPENNT in a single day.

OPENNT is absolutely perfect for porting and deploying your mission-critical UNIX® applications to your Windows NT environment.

It allows UNIX applications to run naturally within Windows NT.

The powerful SDK and UNIX runtime environment will look like home to your UNIX application.

And OPENNT will help you port any UNIX application with few, if any, changes to the source code.

InfoWorld called OPENNT "amazing." Begin porting any application, no matter what size, and you'll agree.

Any questions? Let us answer them. Want references? We have hundreds.

Each one will attest that OPENNT makes moving between UNIX and Windows NT far easier than you ever would have imagined.

INTRODUCING

FEATURE-RICH, NETWORK-INSTALLABLE,
BROWSER-FRIENDLY, 32-BIT TERMINAL
EMULATION AND MORE...

ICE.TCP Pro

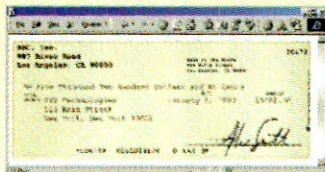

Old and New Worlds Finally Meet in a new release of a world standard - ICE.TCP Pro - brilliantly unbreakable terminal emulation, file transfer, and printing, providing Windows to UNIX connectivity in a sleek new 32-bit GUI, with Internet integration, customization tools, and a bundle of new features.

BROWSING AT LIGHT SPEED

Our telnet speaks web, e-mail, and even "Your App".

Active Highlighting lights up standard URL's like www.newworld.com or columbus@oldworld.com or any key word you choose, like [check#](#) or [photo image](#); then runs an associated

program when you double click, using your favorite browser, e-mail program, accounting application, or viewer.

BLAZING NEW TRAILS

Developers and integrators will discover new and friendly territories with macro recording and playback, active pattern highlighting, Active-X control with an OLE automation interface, screen scraping, auto-run, event notification, and a customizable Internet-smart About Box.

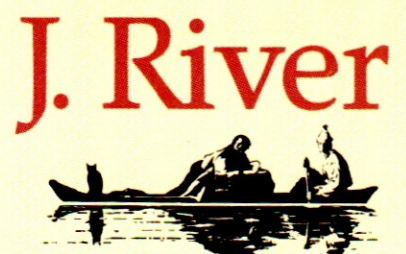

INTELLIGENT NETWORK INSTALL

If your moccasins are wearing thin visiting the village PC's to install network software, you can now stay home while ICE.TCP is installed and configured automatically. Any

networked Windows PC can act as the server from which files, profiles, licensing, and even Microsoft TCP/IP can be configured, managed, and recorded.

OLD WORLD PRICES

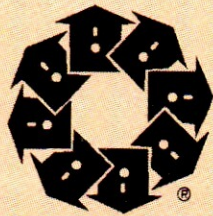

ICE.TCP Pro's New World features are still affordable. Multi-PC prices are under \$90 per seat. Sites of more than 100 users are under \$50 per seat. Point your browser at www.jriver.com for a 30-day trial version of ICE.TCP Pro.

The strongest connections are forged by Attachmate.

The goal – introduce Windows NT® into your UNIX® environment with seamless file, printer and application interoperability. Achievable? Absolutely. With Attachmate® as your partner. Why Attachmate? Because we've been the leader in mission-critical enterprise information access for over 15 years with proven connectivity solutions like KEA!®, PathWay™ and EXTRA!®. Along the way, we've garnered unmatched expertise in TCP/IP, NFS,™ X Window, OpenVMS™ and UNIX as well as a sterling reputation for world-class customer support and service.

Attachmate's new KEA! X Suite offers a complete suite of integrated connectivity applications providing Windows NT and Windows® 95 desktop users with easy access to corporate data and applications on UNIX and VMS™ hosts, and the Internet. A true, 32-bit product, KEA! X Suite includes a powerful, proven PC X server, advanced VT420 terminal emulation, powerful TCP/IP applications, and NFS client support.

To learn more about how Attachmate forges the connections that make it all work and to request free evaluation software, visit our web site at www.attachmate.com/ad/urxs.htm or call 1-800-933-6751.

USE MAINWIN TO PORT
NT CODE TO UNIX,
AND YOU'LL ONLY HAVE
TO REWRITE ONE LINE.

Fast. Flawless. Flexible. When you use the MainWin cross-platform toolkit, you write apps for Windows once, then port the source code to UNIX, using UNIX-native WIN32 APIs. There's no need to double your programming efforts, no need to rewrite your code.

WWW.MAINSOFT.COM

Plus, you can still retain the same Test and QA staff, and even use the same documentation for both versions.

The comprehensive MainWin environment ensures native performance to your existing UNIX customers, while speeding your own migration to the expanding world of Windows NT.

MAINSOFT

You will significantly reduce your development costs and simultaneously launch new applications on Windows and UNIX. For an evaluation copy of MainWin XDE, call us, send email to democopy@mainsoft.com, or visit our website. A few seconds with us might save you months of hard work.

Delta Intranet Server

APC = Year 2000 Non-Compliance

TRIPP LITE = Year 2000 Compliance

Tripp Lite SmartPro® UPS solutions are Year 2000 Compliant today.
APC Smart-UPS® solutions are not.

APC

APC has received your inquiry as to the possible susceptibility or effect of "Year 2000" on our products. We understand that verification of APC's position on Year 2000 compliance is important to your business and to your served customers. The purpose of this document is to provide you with information on our current actions in addressing what, if any effects, the coming of the 21st century will have on our products.

"APC has fully tested its other software products and has identified a few Year 2000 related issues."

APC has tested the following software products for the Year 2000 compliance. Hence these products are Year 2000 compliant:

1. PowerNet SNMP Manager for Novell NMS/ManageWise
2. PowerNet SNMP Manager for HP OpenView for Windows
3. WebAgent for PowerChute plus 3.0 for Windows NT
4. WebAlert for PowerChute plus 3.0 for Windows NT

APC has fully tested its other software products and has identified a few Year 2000 related issues. APC has targeted the following fixes for the Year 2000 program:

Product Name	Compliance Date
PowerChute plus for SCO UNIX	Q2 1998
PowerChute plus for Novell NetWare	Q4 1998
PowerChute plus for OS/2	Q4 1998

PowerChute plus for Windows NT, Windows 95, Novell NetWare, and SCO UNIX Year 2000-compliant releases will be available as free downloads on APC's web site: <http://www.apc.com>

The standard upgrade charge of \$29 will apply to any other Year 2000 compliant software release of APC.

In the meantime, we ask that you contact your local APC office should you have any further inquiries.

Ted Ivos
 APC Account Manager
 APC Corp.

**Call Tripp Lite today at

info@tripplite.com www.tripplite.com

APC openly admits it has a Y2K problem...

And if you use APC Smart-UPS you may have bought your way into their whole Y2K mess. With all the other Y2K issues clamoring for your attention, you don't have time to deal with UPS compliance problems that need to be fixed.

... then APC simply passes the problem onto you

They promise compliance as late as 4th Quarter 1998—can you afford to wait? Can you afford to wait longer if their compliance deadlines are not met?

Tripp Lite offers you a way out of this mess today.

Since Tripp Lite SmartPro UPS systems can control and manage all manufacturers' UPSs, they effectively upgrade many competitive UPS products (including APC Smart-UPS) to Y2K Compliance. This allows you to better manage your legacy UPS installation and still maintain Y2K Compliance.

When you install the Tripp Lite SmartPro solution, you not only get Year 2000 Compliance, but also the advanced features, unsurpassed value and 75-year reputation for reliability that will support your network well into the next millennium.

Actual APC correspondence dated 10/30/97.

THINKING
ABOUT

RAID

for
your

MISSION-CRITICAL

data?

! Then *THINK* about this: many RAID storage vendors list the same features, but not all companies implement those features in the same way. Before you purchase a RAID system, ask each vendor how their products provide the following features...

- ?** Given Ultra SCSI's cable length restrictions, can the system maintain Ultra/Wide SCSI performance (40MB/second) over several daisy-chained RAID units?
- ?** Does the system support the new higher performance 10,000 RPM disk drives? If so, what have you done to handle the additional power, thermal and vibration requirements of these higher performance drives?
- ?** What if I need to reconfigure or add more storage capacity to the RAID system? Do I have to down the system?
- ?** Does the system include free storage management software? If so, does the software provide remote monitoring capabilities via the internet? Does it include a common GUI interface to configure and manage both PC LAN and UNIX operating environments?
- ?** Can this system be upgraded to future technologies such as clustering, LVDS or Fibre-Channel?

! Lots of RAID storage companies claim fantastic features, but when you start asking for details about these features, you will find many are just plain marketing hype. Not at nStor. We incorporate all the above features and many more (too many to list here) into our RAID technology. And, nStor stands behind its products 100% with FREE pre- and post-sales support, unmatched technical support and warranty programs such as "spare-in-the-air" cross shipments of hot swap components.

We're confident you'll see that not only does nStor understand today's RAID technology, we're building RAID systems to support future technologies as well. We invite you to call our nStor account managers at 800.724.3511 and ask how nStor provides these features and many more.

Ever wish you could take your workstation with you? Ever thought how much more productive you'd be if you could pack all the performance in your UNIX workstation into a laptop? You'd be free to work at your desk, at home or in the field. You'd be more versatile. More mobile. More effective.

It's a new way of working

The time has come.

RDI Computer Corporation has designed the first notebooks equivalent to a Sun desktop workstation and a Hewlett-Packard mid-range system. They combine full desktop performance with portability, so you can be more productive whenever and wherever you work.

An UltraSPARC notebook

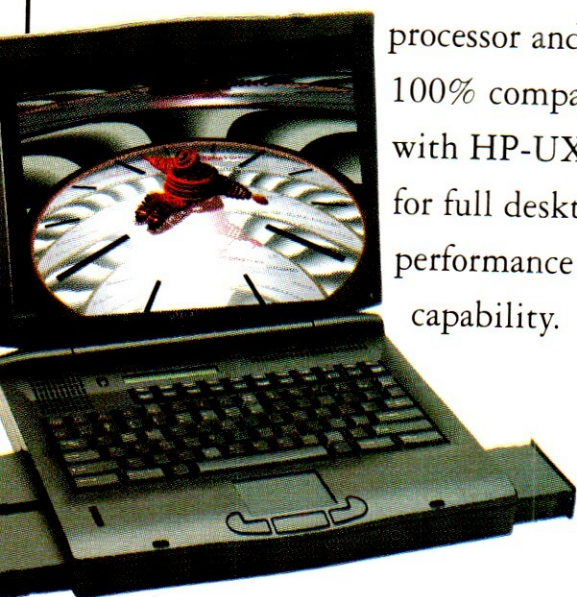

RDI's UltraBook™ is the notebook equivalent of Sun's UltraSPARC® midrange desktop.

There's true desktop power from a 200 MHz or 167 MHz UltraSPARC processor. It uses the same chip set Sun uses and packs full compatibility with Sun Solaris® into a lightweight, compact system.

An HP-UX notebook

PrecisionBook™ is the first portable workstation based on Hewlett-Packard's PA-RISC™ processor architecture. It's the notebook equivalent of HP's VISUALIZE™ B-Class (mid-level) workstation.

PrecisionBook utilizes HP's PA-7300LC™ processor and ensures 100% compatibility with HP-UX 10.20 for full desktop performance and capability.

Both systems support a 14.1" XGA display, up to three removable drives and 512 MB memory.

True desktop performance

UltraBook and PrecisionBook can be effective for applications that don't traditionally demand portability. They offer expansion to configurations even surpassing standard desktops. Such as three removable disk drives and up to 512 MB of field installable memory. A 14.1-inch active matrix LCD provides equivalent usability to a 17-inch CRT monitor.

Now you have a brand new way of working. Use your RDI notebook workstation on the desktop as your primary system for software development, engineering, modeling or dbase. Both systems feature high-end graphics for creating and manipulating complex 2D and 3D images, ideal for CAE/CAD/CAM, ECAD and MCAD.

Business-critical computing

Troubleshooting your network, field data acquisition and off-site training is easier since you can work anywhere, anytime.

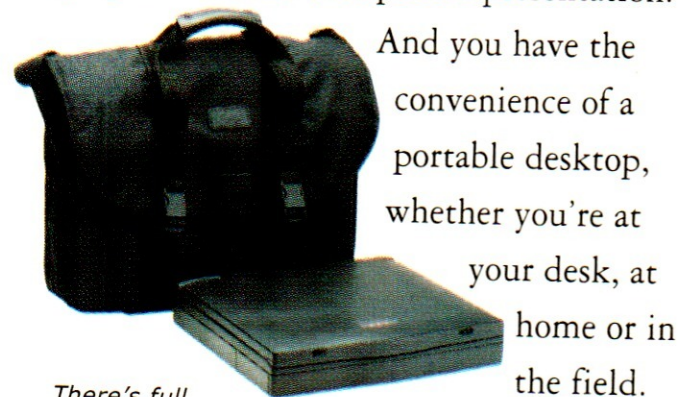

- Perform systems administration, networking, database and customer service applications wherever needed.
- Set up client/server environments at field locations, since an RDI notebook can remotely emulate a UNIX server.
- Use it as a shared resource within a department or for telecommuting.

Software demonstration

UltraBook or PrecisionBook will change the way you work. Swapping your RDI notebook for a desktop makes trade show demonstrations and presentations at client sites so much easier.

You won't have to deal with shipping costs, lost freight, and hassles with rentals and customs. You won't have to rely on your customer to have their system set up for you. You won't have to go in extra early to do on-site configurations.

With your RDI notebook, you're prepared for the unexpected presentation.

There's full workstation performance in a 7.5 lb. notebook, so you're even more productive.

And you have the convenience of a portable desktop, whether you're at your desk, at home or in the field.

For additional information, visit our website or give us a call to discuss how UltraBook and PrecisionBook can give you a new way of working in a mobile world.

Backup Edge Data Archiving Software

Every once in a while a product comes along that is so well designed, reliable and simple to use, it defines a category. Add to that list the network appliance from the company named Network Appliance. It's designed from the ground up to do one thing: serve data.

To see how well we can satisfy your need for UNIX, Windows/NT and Web file service, browse through our website, then hold us to the fire of your network. Nothing beats an original. And for as long as we've been making network appliances, nothing beats a Network Appliance.

DIGI BOARDS ARE DESIGNED WITH GROWING BUSINESSES IN MIND

Digi adapter cards maximize serial connections. Whether you're connecting to terminals, peripherals or data acquisition devices, our serial I/O solutions support 1 to 224 ports from a single PC slot and up to 1,568 ports from a PC server.

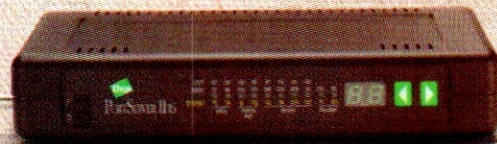

DIGI CLASSICBOARD — FLEXIBLE CONNECTIVITY

- 4 to 16 ports are perfect for smaller installations
- EIA-232 or EIA-422 interfaces provide functionality in any environment

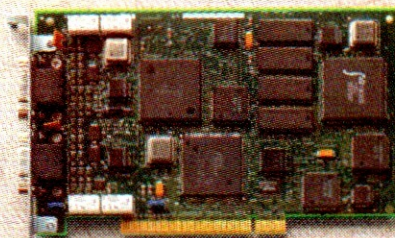

DIGI PORTSERVER II — LAN/WAN SERIAL DEVICE CONNECTIVITY

- 16 to 64 ports anywhere on the LAN provide extended serial connections
- WAN capabilities provide distributed computing

DIGI ACCELEPORT EPC/X — EXPANDABLE HIGH PERFORMANCE

- 16 to 224 ports expand with your on-site and remote needs
- Fast data transfer rates eliminate system bottlenecks

Our products are compatible with everything from Unix to Windows NT. With surge protection and a field failure rate of less than .5%, Digi's products are dependable. And they're backed by a 5-year warranty and a knowledgeable technical support staff.

Call 1-800-228-9286 for more information about Digi's multiport I/O solutions and to request your free Digi Planner CD. Or visit our web site at www.dgii.com.

Exabyte®
every day. every time.

It's not DLT™. It delivers DLT™7000 performance for most applications at half the price. It's forward and backward compatible. It's Mammoth.

The newest server backup technology from the company that invented it. A solution so advanced it takes into consideration the whole picture: your platform, your software, your existing data, and your budget. Now, and down the road...Mammoth. Anything less would be one huge disappointment.

Get your O2 pumping.

The industry's first high-performance system with unified memory architecture demands the highest quality memory upgrades. Insist on Viking high-density synchronous DRAM upgrades, specifically designed for the O2's 128 bit wide data path for accelerated graphics and memory intensive applications. Viking O2 upgrades are tested at-speed, guaranteed compatible, and backed by a lifetime warranty and national field service program. Get your O2 pumping with a Viking memory upgrade today.

IF OUR MEMORY IS GOOD ENOUGH
FOR THE PEOPLE WHO MAKE WORKSTATIONS
ISN'T IT GOOD ENOUGH
FOR YOU?

Kingston MEMORY

ARE YOU PARTICULAR when it comes to workstation memory? So are we. The fact is, Kingston® workstation memory is virtually the same as the workstation manufacturers'. But it costs substantially less. Kingston engineers begin with specifications set by the workstation manufacturers. And they optimize the design of every module to suit the system

www.kingston.com/ws

in which it will be used. Want proof? The leading workstation manufacturers cover Kingston memory in their on-site service agreements. Now, are you ready to save a fortune on quality workstation memory? Just visit our Web site or call (800) 835-2545 for the name of your nearest Kingston dealer.

BROWSER-BASED UNIX ACCESS

Discover the latest theory in web access to UNIX with TERM and TinyTERM v4.0 from Century Software.

Users now have **access to mission critical legacy data from any browser**, anywhere.

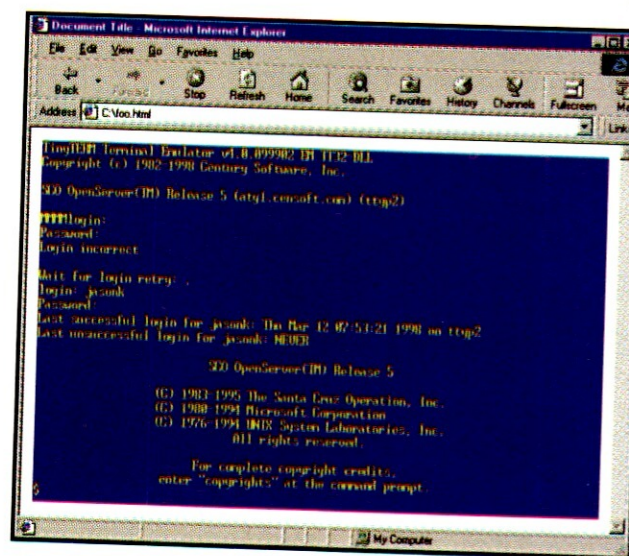

Remote users simply launch a browser, login to their UNIX application, and away they go.

But there's more. Century also allows you to open a configurable emulation session inside a Word document

or Excel spreadsheet. **Live sessions to UNIX data from within MS Office™** - what could be easier?

Only Century helps you make the grade when it comes to UNIX access over the Web. We know comm. We know how to make your look smart. Ask us how.

Visit the URL listed below our logo for a **free evaluation CD** of our products and a chance at a **beany** that will make you look smart.

The Answer to All Your **UNIX** Systems Administration Questions

Call
TODAY
for a FREE
Trial Issue!

- Crash Recovery
- Interconnectivity
- Performance Tuning
- Backup
- Web Integration
- NT Integration
- Security
- and more

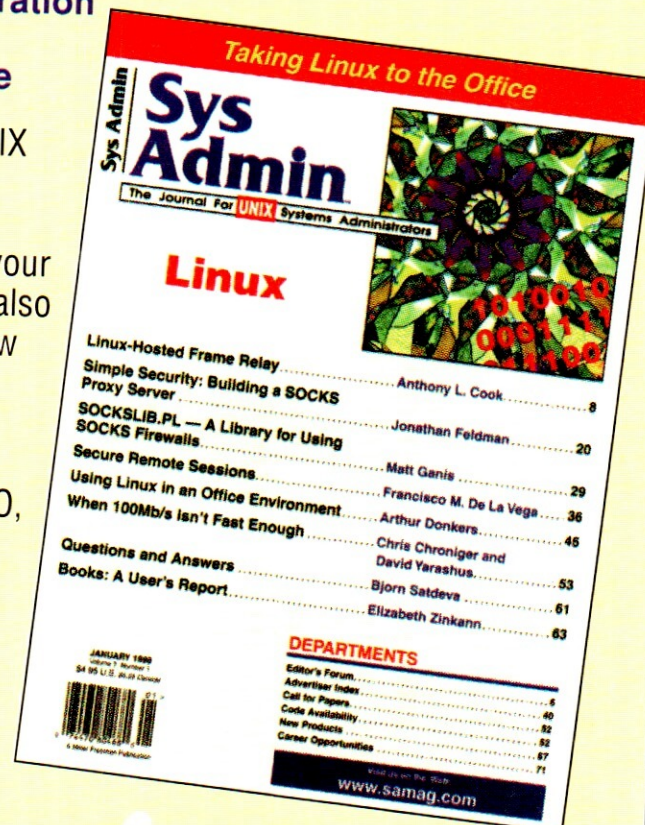

Get the only magazine devoted 100% to UNIX systems administration — solid, technical information full of ways to improve the performance and extend the capabilities of your system. Regular columns and departments also give you a solid look at important books, new product releases and upgrades, career opportunities, and technical meetings and conferences. Coverage spans a variety of platforms including Solaris, AIX, HP-UX, SCO, Linux and others. If you administer a UNIX system — **Sys Admin** can save you and your organization time and money.

Satisfaction Guaranteed!

If you are not 100% satisfied with your subscription, you can call and cancel at any time.
